GENERAL REMARKS

Summary

The device under test does:

- ☒ Fulfill the general approval requirements as identified in this test report and was selected by the customer.
- ☐ Not fulfill the general approval requirements as identified in this test report

Attestations

This equipment has been tested in accordance with the standards identified in this test report. To the best of my knowledge and belief, these tests were performed using the measurement procedures described in this report.

All instrumentation and accessories used to test products for compliance to the indicated standards are calibrated regularly in accordance with ISO 17025 requirements.

I attest that the necessary measurements were made at:

Timco Engineering Inc.
849 NW State Road 45
Newberry, FL 32669
Designation #: US1070

SUMMARY OF JUSTIFICATION

The scope of this technical justification is limited to the emission designators applied to the device during original testing and certification.

The manufacturer of the device has requested a specific emission designator be applied to the device.

The device's 99% Occupied Bandwidth was used to ascertain the product's emission designator for each emission type.

The 99% Occupied Bandwidth emission designator is incompatible with the intended use of the device, as a Project 25 Public Safety radio.

Timco Engineering, Inc., on behalf of the manufacturer of the device, wish to re-assign the manufacturer-requested emission designator to the device after the fact.

TECHNICAL JUSTIFICATION

The allowed channel bandwidth for FCC CFR Part 90 devices such as these is 11.25 kHz.

Both FCC CFR 47 Part 22 E and Part 74 D do not specify an allowed channel bandwidth for devices such as these.

We have supplied the appropriate calculation for the requested Emission Designator, below:

$$\begin{aligned} B_n &= (R/\log_2 S) + 2DK \\ B_n &= (9600/\log_2(4)) + 2(1800)(0.916) \\ B_n &= 4800 + 3298 \\ B_n &= 8.10 \text{ kHz} \end{aligned}$$

Where:

$$\begin{aligned} R \text{ (data rate)} &= 9600 \text{ bps} \\ D \text{ (peak deviation)} &= 1800 \text{ Hz} \\ S \text{ (symbols)} &= 4 \\ K \text{ (constant)} &= 0.916 \end{aligned}$$

Necessary Bandwidth for 8K10F1E/F1D = **8.10 kHz**

The manufacturer wishes for the emission designators be updated as follows:

8K57F1E (C4FM Voice) corrected to **8K10F1E (C4FM Voice)**

8K57F1D (C4FM Data) corrected to **8K10F1D (C4FM Data)**

Note: 11K2F3E (FM Narrowband Analog Voice) shall remain unchanged.
